

1.

**Which strategy leads to the least external fragmentation in most cases?**

- A. Best Fit**
- B. First Fit**
- C. Worst Fit**
- D. None of the above**

**Answer: A**

2.

**In paging logical address is divided into:**

- A. Page number and frame number**
- B. Page number and offset**
- C. Offset and segment**
- D. Page size and block size**

**Answer: B**

3.

**Fragmentation in Operating Systems occurs due to:**

- A. Improper file naming**
- B. Improper I/O scheduling**
- C. Inefficient memory allocation**
- D. CPU Scheduling**

**Answer: C**

4.

**Optimal page replacement algorithm replaces the page:**

- A. That will not be used for the longest period of time in future**
- B. That is least recently used**
- C. That is first added**
- D. That has lowest priority**

**Answer: A**

5.

**Which of the following statements is true about thrashing?**

- A. It improves system performance**
- B. Occurs when CPU is underutilized**
- C. Occurs due to frequent page faults**
- D. Happens when disk I/O is disabled**

**Answer: C**

6.

**Which of the following page replacement algorithms may cause Belady's Anomaly?**

- A. FIFO**
- B. Optimal**
- C. Random**
- D. None of the above**

**Answer: A**

7.

**SSTF stands for:**

- A. Smallest Storage Transfer Format**
- B. Short Sector Transfer Function**
- C. Sorted Seek Track Format**
- D. Shortest Seek Time First**

**Answer: D**
