12 April 2026 20:00

[0]	[1]	[2]	[3]	[4]	[5]	[6]	[7]	[8]
11	22	33	44	55	66	77	88	99

Left Mid Right

1) Key = 68.

2) Left : 0
Right : 8
Mid : 4

3) Compare :
Key == arr[mid]
68 == 55 ? NO

4) Check , as the key is bigger , continue in the RSA.
RSA : Mid+1 to Right

Continue with steps 2,3 and 4 for RSA.

1. Left : Mid+1 : 5
   Right : 8
   Mid : 6

2. Compare
   Key == arr[mid]
   68 == 77 ? No

3. Check key is smaller
   So continue in LSA

LSA is from left to mid-1
Left : 5
Right : Mid -1 : 6-1 : 5
Mid : 5

4. Compare :
   68 == 66 ? NO

As the key is greater continue in RSA
Mid + 1 to Right
Left : mid +1 : 6
Right : 5

The sub-array is From index 6 to index 5
Which is invalid
