

```

struct node
{
    int data;
    struct node *next;
};
  
```

self referential structure.

A structure which has a pointer field of its own type.

Pointer revision

```

int num1 = 10;
int *pte = &num1;
  
```

```

char ch = 'A';
char *cpte = &ch;
  
```

```

float fnum = 1.2f;
float *fpte = &fnum;
  
```

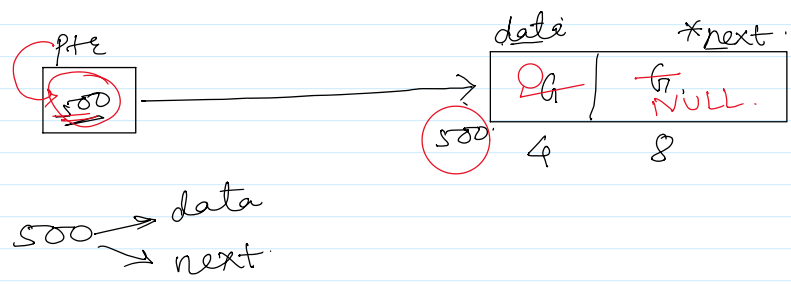

```

struct node *pte = (struct node *) malloc (size of (struct node));
  
```
