

① Create a node  
`node* new_node = create_node();`

② `new_node->data = value;`

③ Attach the node.

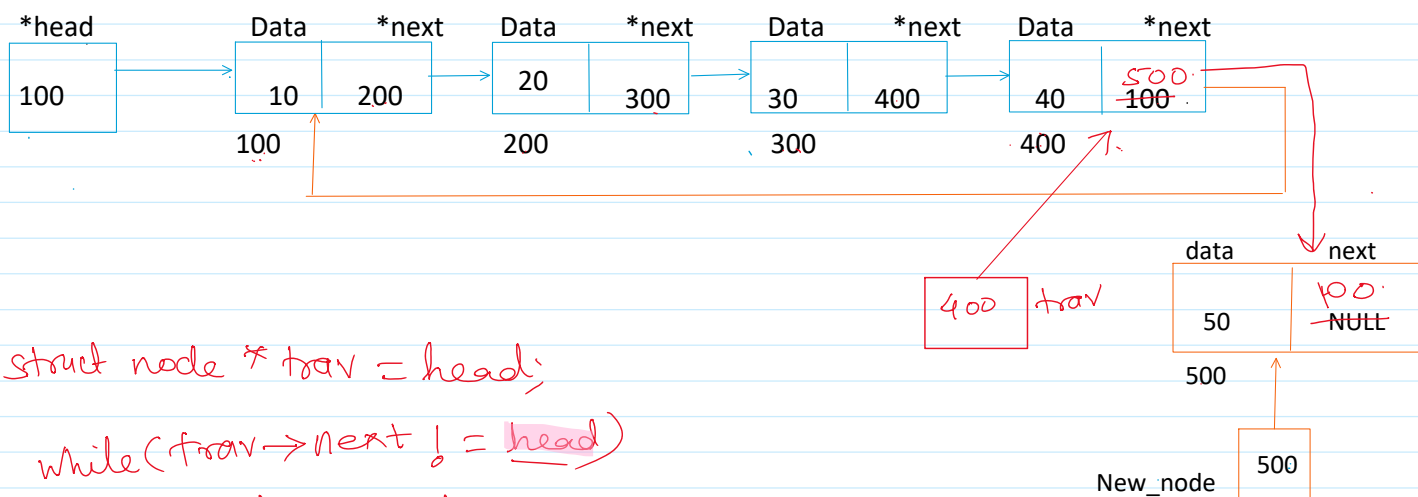

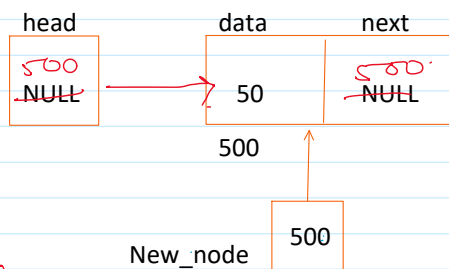

a) `if (head == NULL)`

{

`head = new_node;`

`new_node->next = head;`

}

1) `struct node * trav = head;`

`while (trav->next != head)`  
`trav = trav->next;`

2) `trav->next = new_node;`

3) `new_node->next = head;` ✗
