

1.

Which of the following searching algorithms is fastest for a sorted list?

- A. Linear search**
- B. Binary search**
- C. Ternary search**
- D. Non- Linear search**

Answer: B

2.

In case of binary search what is the first comparison made on a sorted array?

- A. Middle element**
- B. 1st element**
- C. Last element**
- D. second element**

Answer: A

3.

What is the worst case time complexity of Linear search?

- A. $O(1)$**
- B. $O(\log n)$**
- C. $O(n)$**
- D. $O(n \log n)$**

Answer: C

4.

What is a fundamental precondition for applying the Binary Search algorithm?

- A. data must be unstructured**
- B. data must be semi-structured**
- C. data must be unsorted.**
- D. data must be sorted.**

Answer: D

5.

How many comparisons are done in Linear search to find the key is input array is

int arr[10] = {44,6,8,3,223,233,323,322,76,89} and key =233?

- | | |
|-------------|-------------|
| A. 5 | C. 3 |
| B. 6 | D. 4 |

Answer: B

6.

How many comparisons are done in binary search to find the key is input array is

int arr[10] = {3,6,8,10,223,233,322, 323, 776,889} and key =233?

- | | |
|-------------|-------------|
| A. 5 | C. 3 |
| B. 6 | D. 4 |

Answer: C
